Medical Officer's Remarks: Pt under my care and continues to improve. He has not reported any suicidal thoughts and guards have not reported any behavioral problem. I have discussed the case with my consultant, Col Melow, who concurs that it is now safe to remove him from POI status due to his decreased level of risk. My understanding of Brig regulations is that all detainees on max status are checked every 15 minutes. That should be sufficient. I will continue to follow him.
