| A. Mission Description. MP flew this recurring QUAL/INSTM evaluation in the WST on an Elmendorf AFB local profile. MP instruction of Abnormal Configurations and Departure Alternate criteria and procedures to a First Pilot were noteworthy. Other required objectives were evaluated, including CAT II ILS, engine out operations and a nonstandard configuration. All items observed were completed in an excellent manner. Special interest items were evaluated and PAR procedures were verbally evaluated due to simulator time constraints. Lt Col WITNESS 22 , 249 AS/CC, was debriefed on the results of the evaluation. |  |  |  |  |  |  |  |  |  |  |

| EXAMINER'S REMARKS:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |  |  |  |  |  |  |  |  |
| A. Mission Description. MP instructed CAT II ILS procedures and abnormal configurations on this recurring QUAL/INSTM evaluation. The evaluation was flown in the WST on an Elmendorf AFB local profile. Required objectives were evaluated, including CAT II ILS, engine out operations and nonstandard configuration. All items observed were completed in an excellent manner. Special interest items were evaluated and PAR procedures were verbally evaluated. Lt Col <sup>WITNESS 30</sup> , 249 AS/CC, was debriefed on the results of the evaluation. |  |  |  |  |  |  |  |  |  |
| B. Discrepancies.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |  |  |  |  |  |  |  |  |

| A. Mission Description. First Sortie. This recurring mission evaluation was flown on a local Elmendorf AFB training flight. Itinerary included a day low level and threat reaction procedures on IR 921, assault landing on the painted zone at Elmendorf AFB, and ground operations supporting USARAK combat equipment load validation at Eielson AFB. All required objectives were evaluated except air refueling, due to tanker maintenance problems. Especially noteworthy was knots.  MP 's assault landing with gusting crosswinds in excess of 20 |

| Second Sortie. This flight was conducted to complete the air refueling portion of MP is mission evaluation. Auto-pilot on and off air refueling with a KC-135 was evaluated at night on AR 505E. MP instructed during both contacts. All elements of the evaluation were conducted in an excellent manner. LTC 249 AS/DO, was debriefed on the results of the evaluation.                                                                                                                                                                                |

Additional Comments.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 1. This evaluation was completed after the original MSN expiration date due to the lack of tanker support for air refueling and the lack of available evaluators during the unit's initial stand-up. The new expiration date waiver for 30 Nov 07 was approved by the 249 AS/CC and 176 OG/CC.                                                                                                                                                                                                                                                           |

# AF FORM 8, MAY 85 CONTINUATION SHEET B. Discrepancies: 1. Ground. None. Area 4. Use of Checklists -- U. Examinee used wrong checklist while performing nonstandard configuration emergency procedure. Examinee misread checklist and chose a slats/no-flap checklist when the no-slat/no-flap checklist should have been used. Area 6. Crew Coordination/CRM -- U. The examinee confirmed an incorrect flight configuration during a nonstandard configuration. Examinee confirmed with the pilot not flying a slat/no-flap configuration, on final, when all indications in the WST indicated a no-slat/no-flap configuration. Area 13B. Landings - U. Examinee, while maneuvering to land, held a speed of 148 KCAS. The mission computer called for an approach speed of 166 KCAS. Examinee noticed the discrepancy at 40 ft AGL, added a large amount of power and touched down at 150 KCAS. C. Recommended Additional Training. 1. Flight. Fly a minimum of two instructor supervised WST sorties emphasizing proper nonstandard configuration procedures. ADDITIONAL REMARKS: MP completed the second WST on 9 Jan 06. MP completed all additional training in a satisfactory manner and is recommended for his requalification evaluation. , Capt, USAF 10 AS/DOV

| EXAMINER'S REMARKS:  A. Mission Description: This requal airdrop evaluation was flown on a local McChord AFB two ship training sortie. Requal required due to multiple real world missions and scheduling conflicts. Itinerary included formation air refueling on AR9AE/W, assaults at Moses Lake, low-level on IR327, multiple airdrops at Larson DZ, and recoveries to Moses Lake. This evaluation was completed in a satisfactory manner. Special interest items were evaluated. Lt Col , 10 AS/CC was debriefed.  B. Discrepancies: None. |             |       |                            |             |                               |                          |                |                        |  |

| A. Mission Description. This initial instructor evaluation was conducted on VR 106 and AR 400 N/S. Tactical approach, assault landing and ground ops were conducted at Altus AFB. Instruction on air refueling, low level, VFR patterns and ground operations was both timely and appropriate. MISSION Areas 29 through 34 were evaluated. This evaluation was completed in an excellent manner. |  |  |  |  |  |  |  |  |  |  |  |

|   | A. Mission Description.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|   | First Sortle: MSO completed the following required events on this recurring mission evaluation including operations on IR919, threat reactions and an assault landing to the painted ALZ on Rwy 16 at Elmendorf AFB, AK. Due to poor weather and RCR at the primary Assault Landing Zone, the 176 OG/CC approved operations to the painted ALZ in accordance with AFI 11-2C-17V2, paragraph 2.4.2.1. Due to tanker maintenance issues, the required evaluation air refueling event was not completed. Lt Col WITNESS 22 249 AS/CC, was debriefed on the results of the evaluation. |
|   | Second Sortie: MSO conducted air refueling on AR506S with a KC-135R to complete all required events on this recurring mission evaluation. Lt Col WITNESS 22, 249 AS/CC, was debriefed on the results of the evaluation.                                                                                                                                                                                                                                                                                                                                                            |

|               | A. Mission Description. This initial OME was conducted on an Indian Ocean channel mission originating from Elmendorf AFB and transiting Yokota AB, Paya Lebar (Singapore), Diego Garcia, and Bahrain. This OME was conducted in conjunction with aircraft commander certification.  MSO completed this mission, including all mission planning, tactical requirements, and crew management in an excellent manner.  Lt Col <sup>WITNESS 30</sup> 249 AS/CC was debriefed on the results. |   |

| A. Mission Description. This evaluation took place on a day local with air refueling on AR505W.  MSO was in the left seat for his portion of the eval. He performed PF duties on the departure and rendezvous. Both autopilot on and off air refueling were stable.  MSO flew a high altitude tactical arrival to an assault to a full stop at Elmendorf. This evaluation was completed in an excellent manor and the results of were debriefed with Lt Col WITNESS 22 |
| B. Discrepancies. None.                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| C. Recommended Additional Training. None.                                                                                                                                                                                                                                                                                                                                                                                                                              |
| D. Additional Comments. Tactical arrival energy management and rendezvous procedures were noteworthy.                                                                                                                                                                                                                                                                                                                                                                  |

#### AF FORM 8, MAY 85 CONTINUATION SHEET

### IV. EXAMINER'S REMARKS:

A. Mission Description: VSO flew this INSTM/QUAL evaluation in an F-16C with the SEFE in chase and in conjunction with a RAP sortie. Profile: Mission planning, single-ship takeoff, climbout, departure, in the Bearpaw/Hays airspace, enroute navigations to the IAF at BETON with holding, followed by the TACAN penetration, missed approach, climbout, to ILS approach at GTF. Additional pattern work included Overhead SPO at GTF followed by an overhead pattern and full-stop landing

#### AF FORM 8, MAY 85 CONTINUATION SHEET

#### IV. EXAMINER'S REMARKS:

A. Mission Description. MSO flew this air-to-air mission evaluation as number 1 in a 2-ship DCA mission to the BP/Hays airspace, employing medium threat tactics in a Korean scenario. The SEFE flew as number 2. Profile: Mission planning, brief, single-ship takeoff, departure, entry into the BP/Hays airspace, point for a 20 minute vul period. Package composition was F-16C vs F-16C simulating 2xM-29's/1xm-15 DACT, consisting of 4 engagements. The mission concluded with 2-ship battle damage check, inflight report, and RTB. Reactions to EC and adversary aircraft were accomplished including intercept of threat aircraft to weapons parameters. Air Sovereignty Tasking accomplished IAW MAJCOM directives. Post flight VTR analysis was accomplished

Weapons Score:

\*AIM-120 6/6

\*VTR assessed by SEFE

- B. Discrepancies.
  - 1. Ground (EPE). None
- 2. Flight.

  Area 52, Tactical Execution. Examinee's excessive offsets on 2 engagements led to missed targeting and allowed bandit to get through to HVAA. Examinee debriefed.
  - C. Recommended Additional Training: None.
  - D. Additional Comments:
- V. REVIEWING OFFICER'S REMARKS:
- VI. APPROVING OFFICER'S REMARKS:
- VII. ADDITIONAL REVIEWS:

#### AF FORM 8, MAY 85 CONTINUATION SHEET

#### IV. EXAMINER'S REMARKS:

- A. Mission Description. MSO flew this INSTMT/QUAL evaluation in an F-16C+ with the SEFE in chase and in conjunction with a RAP sortie. The profile consisted of mission planning, brief, single-ship, climbout, departure, airwork, ACT in the Bearpaw/Hays ATCAA/MOA, enroute navigation to the holding fix/IAF at KGTF Runway 03 followed by the ILS penetration, low approach and climbout to a TACAN approach at KGTF, Runway 21. Additional pattern work included an overhead SFO, an overhead pattern and a full-stop landing at KGTF.
  - B. Discrepancies: Flight. Area 42, Instrument Penetration (Q-): Examinee started descent for penetration early and corrected during the penetration. Examinee was debriefed.
  - C. Recommended Additional Training: None
  - D. Additional Comments: None
- V. REVIEWING OFFICER'S REMARKS:
- VI. APPROVING OFFICER'S REMARKS:
- VII. ADDITIONAL REVIEWS:

## AF FORM 8, MAY 85 CONTINUATION SHEET IV. EXAMINER'S REMARKS: MSO completed a mission evaluation as lead of a 2 ship formation on an ACT mission. The SEFE was A. Mission Description: number 2. Adversaries were 2 F-16C's simulating MiG-29's carrying 2 (10A) x 4 (11) x G. Key mission elements included briefing, debriefing, trail departure, air sovereignty and airwork: DCA. Simulated ordnance carried was 5 AIM-120's x 1 AIM-9 x G. The scenario was DCA using both visual and positive ID criteria. The mission terminated with a full stop at GTF. Weapons Scores: AIM-120 4/4\* \*Video assessed by SEFE B. Discrepancies: None C. Recommended Additional Training: None D. Additional Comments: MSO completed an overhead SFO @ GTF to clear up his unaccomplished SFO on his last INST/QUAL checkride Examinee debriefed. V. REVIEWING OFFICER'S REMARKS: VI. APPROVING OFFICER'S REMARKS: VII. ADDITIONAL REVIEWS:

#### Examiner's Remarks:

A. Mission Description: The examinee flew to Ellsworth AFB, SD, on a single-ship instrument mission. Following an instrument departure from Joe Foss Field, the examinee flew the IR-514 MTR, TACAN penetration and TACAN approach to Runway 31, followed by a VFR pattern and full-stop landing. The examinee then returned to Joe Foss Field via the IR-613 MTR, followed by holding at the SKIES IAF, HI-ILS penetration and approach, SFO and closed full-stop landing to Runway 03. Lt Col was debriefed on mission results.

- B. Discrepancies:
  - 1. Ground (EPE). None.
  - 2. Flight.

Area 22. Emergency Approach/Landing --Q- debriefed. Minor deviations from recommended airspeeds and altitudes.
