| Examiner's Remarks:                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| A. Mission Description. This evaluation was accomplished during a night tactical training mission. The profile included a low-level route to an NVG helicopter air refueling (HAR) near R2202, two SCA landings at Eielson AFB with the actual in/ex-fil of a 4-wheeler and RTB to complete the mission.  MLM instructed on Trail-line procedures and in/ex-fil preparation/rigging procedures. Lt Col 211 RQS/CC was debriefed on mission results. |
| Flight Examiner's Comments. MLM demonstrated excellent crew coordination throughout the flight.                                                                                                                                                                                                                                                                                                                                                     |
| B. Discrepancies.                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Ground.     Area 8. Use of Checklist - Q- Failed to accomplish the "Cargo Loading Preparation" checklist in -9CL-1. He loaded and succured the 4-wheeler with a full tank of gas. He corrected the mistake when discovered by downloading the 4-wheeler and removing the required fuel. The 4-wheeler was reloaded with less than 3/4s of a tank. No mission delay resulted. Debriefed.                                                             |

| A. Mission Description. This spot evaluation was administered in conjunction with a HQ PACAF/DOTV ASEV. The profile included a modified contour NVG low-level route to a CARP (SATB) at Nielson DZ followed by an SCA at EDF AFB to complete the mission. Lt Col , 211 RQS/CC, was debriefed on the results of this evaluation. |                                                          |  |  |  |  |  |  |

| A. Mission Description. This evaluation was accomplished during a local area day tactical training mission. The profile included a low-level route to a HAR, a pararescue personnel static-line airdrop at Malemute DZ, a loadmaster directed ramp bundle airdrop followed by free-fall and parabundle airdrops to complete the mission. Lt Col , 210 RQS/CC was debriefed on mission results. |                                                                                      |  |  |  |  |  |  |  |

| A.      | Mission Description: This evaluation was centered on an actual Civil Search and Rescue mission. The Rescue was terminated shortly after takeoff and efforts were directed to Malemute Drop Zone to accomplish a personnel static line airdrop followed with loadmaster directed para bundle and freefall drops. Due to an IFE, the mission was terminated prior to completing the evaluation. Lt Col. , 210 RQS/DO was debriefed on the results of the flight. |
|         | Flight Examiner's Comments: The examinee completed all tasks prior to flight and performed well in the aircraft. The IFE was handled appropriately and IAW proper directives. The items needed to complete the evaluation are Area # 147 Airdrop Rigging Procedures, and Area # 150 Airdrop Knowledge.                                                                                                                                                         |

| A.      | Mission Description: This evaluation consisted of a day tactical low-level flight that terminated with an SATP bundle. A HALO personnel drop ensued after the SATP followed with Para bundle and freefall drops. Lt Col. 210 RQS/DO was debriefed on the results of the flight.                                                                                                                                                                                |
|         | Flight Examiners Comments: MLM completed all phases of flight admirably and in a professional manner. He exercised excellent checklist discipline and crew coordination. All loadmaster drops landed within acceptable criteria.                                                                                                                                                                                                                               |

| A.    | Mission Description: 8 May 92: This first attempt was scheduled as a tactical low-level to airdrops and helicopter air refueling. A complete rescue alert preflight was successfully completed with a manual form-F. The mission was canceled due to maintenance. 21 May 02: This mission was a day RAMZ deployment 5 free fall PJs followed HAR. Lt Col , 210 <sup>th</sup> RQS/CC was debriefed on evaluation results. |
|       | Flight Examiner's Comments: MLM completed this complex mission in an efficient professional manner while supervising a very inexperienced secondary loadmaster. His CRM, especially in coordinating airdrop tasks with his secondary were excellent.                                                                                                                                                                     |

### AF FORM 8, MAY 85 CONTINUATION SHEET

#### Examiner's remarks:

A. Mission Description: This evaluation was conducted on a tactical mission consisting of a pre-flight of mission aircraft, a low level to a CARP personnel deployment, parabundle and freefall equipment drops and an air refueling. LtCol 210RQS/CC was debriefed on the results of this evaluation.

Flight Examiner's Comments: On 16 November 1999 Examinee was scheduled to fly a low level to a personal deployment, followed by equipment drops then an air refueling event. Examinee arrived for briefing on time. A Form-F was accomplished without any discrepancies noted. Mission was canceled do to aircraft maintenance problem. On 17 November 1999 examinee was rescheduled to perform the same mission. Examinee arrived on time for briefing. Examinee completed aircraft pre-flight in a timely manner but neglected to complete his required checks on interphone panels, the right paratroop door, center overhead escape hatch emergency exit light, restraint harnesses and emergency equipment in rescue bin. Examinee was asked several questions on aircraft systems and ditching emergency procedures, all questions were answered in a thorough and complete manner. Examinee performed the personal deployments and a simulated hung paratrooper event in a highly professional manner. Examinee then performed two parabundle and two free fall drops. All checklist items and drops were completed without discrepancies. Examinee was then tasked with a single ship air refueling event. All checklist items were completed. During the air refueling the receiver requested a frequency change requiring a different radio. The tanker acknowledged but the examinee was unsure of proper radio check procedures after tanker and receiver had switched to a new radio. There were no other discrepancies noted during this event. Prior to landing at home station examinee failed to complete his "Before Landing Checks", he called them complete without physically checking the required items in the checklist. Examinee also did not properly check the "EMI Filter Safety Pins" during the after landing checks.

## B. Discrepancies:

### 1. Flight:

Area 4, Use of Checklist - Q-, Did not properly complete the before landing checklist or the after landing checks. Area 52(B), Air Refueling/Communications - Q-. During air refueling portion examinee was unsure of proper radio check procedures with the receiver after a radio change occurred between the tanker and the receiver.

### 2. Ground:

Area 21, Aircraft Inspection - Q-. Did not inspect cargo compartment interphone panel, right paratroop door, center overhead escape hatch emergency exit light or restraint harness properly.

Area 24, Extra Equipment Inspection - Q-. Did not adequately inspect contents of the Rescue Equipment Bin

# C. Recommended Additional Training:

# 1. Ground:

- 1. Examinee will re-accomplish an aircraft pre-flight with an instructor.
- 2. Examinee will receive ground training on Air Refueling Communications procedures.

3. Examinee will receive ground training on proper adherence to checklists. Reviewing Officer's Remarks: Final Approving Officer's Remarks: concer w/acting taken -Recommended additional ground training was successfully completed on 18 Nov 99. ogv 🏄
