SUBJECT	Operational Monthly Report, 1 - 31 October 1963		

ACTION REQUIRED - REFERENCES

Action: None; for your information.

Presented below is a reporting of the operational and support activities Gregory D. PARMUTH for the above mentioned period.

1. GENERAL SUMMARY OF ACTIVITIES

Two photographic operational assignments were requested of PARMUTH during the month of October. Station support consisted of the following support. The servicing of three KURIOT requests for information and materials. MECHART was supported on two audio operations at hotels in Mexico City. PARMUTH was requested by the Military Attaché Office and the Chief of Station to train Army personnel in photography. Station print production finished with 3,102 prints a good part of which was done by PARMUTH's trainee Louis P. KASNICKA. Outside support activity was high. Photographic basehouses covering Soviet and Satell embassies produced normal coverage with the exception of the LIEBODE basehouse which has the VLS-2 trigger device to cover the additional entrance at the Cuban Embassy.

2. TDX

None. Two trips are pending for November or December, one to Monterrey and the other to Veracruz.

3. TRAINING

A. On 10 October 1963, at the request of the Embassy Military Attaché Office, PARMUTH conferred with Colonel Hubay and the Chief of Station regarding the improvement of the army photographic laboratory. Colonel Hubay mentioned several serious problems concerning this facility, i.e., the general rundown.

condition of their photographic laboratory, problems of untrained personnel maintaining this facility. The colonel gave as an illustration the following: Their laboratory was given eight rolls of 35mm film taken by Hubay who used the Air Attaché plane to photograph airports, bridges and roads in Mexico for a report to be sent to his Headquarters. The processor, confusing his development procedure immersed the eight rolls of film first in the fixing bath then in film developer which destroyed the entire batch of film. The colonel posed the possibility of having his film developed and printed by the Station. The Chief of Station stated that the Station could not render photographic support to the Military Attaché Office on a regular basis but would agree to have PARMET train one of his staff in photographic procedures. PARMET began this training on 28 October 1963. Forwarded as attachment A is the training report on Sgt. P. Dall, U.S. Army.

B. Louis P. HANRICK completed thirty-seven hours of photographic training. Forwarded as attachment B is the training report.

4. OPERATION

A. On 11 October 1963, the Deputy Chief of Station instructed PARMET to meet with the local U.S. Customs agent who was requesting photographic support. PARMET, with the agent present, photographed documents at a hotel in Mexico City. The documents were to be used as evidence against narcotics couriers who were apprehended at Laredo, Texas by customs agents. The couriers had in their possession ten one-kilo bags of uncut heroin.

B. On 24 October 1963, Julian V. MURRAY requested PARMET to photograph a meeting between LIEUT/1 and two KGB agents who were to meet in the down town area of Mexico City. The box camera concealment device was used on this operation. Although the targets did not appear, one roll of 35mm film was expended on this operation as a practice exercise.

5. STATION SUPPORT

A. On 3, 4 and 5 October 1963, PARMET was requested to assist Harry C. MILFORD in monitoring a receiver at an LP located at a hotel in Mexico City. The purpose of this operation was to record conversations of Tito or his official party who might be staying at the target suite. This suite was not occupied by Tito or his staff during their stay in Mexico.

B. On 8 October 1963, PARMET was requested by the Station to arrange a meeting with LIEUT/22 and an LGEN/22 operator. The meeting took place at the LIEUT/22 safehouse on the evening of 8 October. The operator reported that there were no indications of deception on the part of L-22.

C. On 8, 10, 11 and 12 October 1963, PARMET was requested to assist James F. BISCHOFF in monitoring a receiver at an LP located in a hotel in Mexico City. The purpose of this operation was to monitor conversations between a visiting LGEN/22 case officer and his agent and possibly to record conversations between this agent and a ChiCom target if this target agreed to meet the agent at his hotel room. The agent was unwitting of this emic operation.

D. On 17 October 1963, PARMET presented a one hour operational photographic briefing to the Station case officers. The briefing consisted of the following subjects: General photographic laboratory support done at the Station; clandestine photography using body concealment devices; photographic trucks; basehouse photography covering Soviet and Satellite embassies; coverage using both the [] camera and the LIEUT/22; copying devices which could be used by case officers to photograph material when it would be impractical to pass this material to the Station for processing; mounting of photographs which is done both at the Station and at KUNIC for Station support operations. In addition, SW activity was discussed briefly including an explanation of the use of carbons and developers. The briefing was concluded with a demonstration on the development of a 5% emulsion using the spray method of application. Each subject discussed during the briefing, was supported by a display of photographic equipment and prints taken under operational conditions.
