Subject: Review Track CHANGE!!

In an effort the speed up the loading of the RIF document I have made a change in how the edit document button works. Things will go faster now. However it is possible that the RIF has information in the list that is out of date. Once a reviewer has completed the review process and sent the document to the supervisor the document will be refreshed and will reflect all changes made by the reviewer. I have added a button at the top of the Postpone detail listing that will allow you to refresh the document if needed.I have also added a new button on the second page of the Postponement Detail. It is called ALTERNATE BOARD REASONS, please do not use this yet, I am working with the teams to customize the lang. and this will be active in the next week or

Body: so.thanks
