Operation SoloThe FBI's Man in the Kremlinby John BarronJeff Stein states in his review of this book:"Barron's focus, however, is on the two missions the Childses took to communist capitals. And they were formidable. One had Morris Childs learning directly from Fidel Castro in 1964 that Lee Harvey Oswald had visited the Cuban Embassy in Mexico with plans to assassinate President Kennedy. The FBI's puzzling reaction to that was to bury the report for 30 years."
