**Subject:** excel

**Body:** I got two error messages today each time I went into excel, although it let me in and everything worked fine once I was in. The messages were:"You must exit Windows and load share.exe in order to run Microsoft Excel" and then had the options of ok or help. I chose ok and got:"Cannot open or save any more documents" in excel with an ok option. I clicked ok and got in.Any clue? No rush 'cuz like I said, it all worked fine once I got in.
