**Subject:** Privacy briefing

If you have a chance today, could you give me a list of the privacy topics you've come across/have examples of for the privacy briefing? I'm trying to figure out what individual topics we need to address as well as provide a basic overview. I'm aiming to have a final draft with enclosures ready for Monday morning, so anything you have right now would be helpful. I'm hoping to pass drafts to you and Tom before then, but depending on how long this takes to pull together (and how much disruption there is from the move) I may need to give it to you

**Body:** Monday am also. Thanks!
