Subject: error messages
I got a few error messages today. When I was trying tochange my password using the hand icon I got 1) The working directory is invalid and when I said OK I got 2) The path z:\public\setpass.exe is invalid. when I said OK it kicked me out and back to the main screen.So, I logged out and logged back in to change my password. I changed it and then got 1) Cannot find a device file that may be needed to run Windows in 386 enhanced mode and 2) You need to run the set-up program again. aw_vcd.386. Press a key to continue. I did and it let me in.That's all for now!
