**Subject:** Formatting Query's

**Body:** I need some help formatting and finding useable information from both the open and postponed document data bases. Example of query: Give a printout of query used(at the top of the request); for requesting all (originated) ONI documents that were postponed and the reason why they were postponed. I need titles of those documents and dates. If I pull down the RIF and fill in those fields requested do I get that information I'm looking forI would like to sit down and brainstorm some ideas today.Thanks.
