**Subject:** Lexis printing problems

**Body:**  
I'm having trouble again trying to download material from nexis to my disk.. The document we retrieved last week from lexis was still on my document.dsk and printed, although it threw in lots of page breaks and didn't format it as continuous text. When I tried to append material from Nexis, it didn't appear. I tried deleting the lexis material and downloading again, but the nexis material is not on the disk that I can find. (I inadvertently also converted a file in the lex28 subdirectory on my "C" drive -- "dcm" from the "unknown format" to the one you showed me to use to print, thinking it might be where the nexis material was. Help!
