Subject: FBI stuff
Body: disks are in my office, one was empty and I wrote BAD DISK and left it on top of the box, I put the database in the G:\prg and just left the names FBI_DATA and FBI_SUB, It looks like a program called newdocs.prg is the one we last used to add the data, take a look and if so I can run it when I come in Today. The passwords for all of the board members is set to thunder. Good luck on your meeting.
