**Subject:** Ballistics/bullets evidence.  
Phil, I understand you have been working very hard on evidence regarding bullets and such. At Archives II yesterday I found a document that I got all excited about but I've since been told that we know all about it and it's not a lead. Needless to say, I'm embarrassed of my ignorance. May I look at any memos/drafts/summaries you've put together regarding bullets and ballistics, in order to improve my knowledge of the subject? It would be helpful to me. Thank you.
