**Subject:** Database error  
The problem we had in the search is caused by Lotus notes use of the - in the search function. If you use the following 44?44?\* (note the use of the ? in place of the hyphen.) It should work. Also you might want to use the Form for the search. I think I have another workaround and will play with it some more and let you know if it works better than the above.
