**Subject:** Investigations database

FEAR NOT, THIS IS NOT A PROBLEM!!! now have two Investigative issues which are in 'closed' status. Can you design some type of field or designation to show the status, or could we use the 'date completed' field at the end of the issue screen and in addition to putting the date in when I finish an issue I could also input 'closed' or 'pending inactive' with a date to review the issue to determine if it should be closed or if it needs to stay in 'pending inactive' or if it needs to be changed to an 'active' case (this latter would be a tickler system of sorts.) I would also like the case status, "O" (open); "PI" (pending inactive); and "C" (closed) to appear at the View screen by the issue number and at the top of the Issue screen, somewhere near the issue number. This information will enable me to track cases, will allow David to check the progress and status of my work more easily, and will make it easier, I hope, to compile stats at any time when we want to know how many open, closed, and pending inactive issues we have.
