Subject: Regs revision

On the "g" drive is the latest version of the interpretive regs. I'm still working on revising the supplemental section, but the regs themselves are pretty much set with the exception of 1400.8 (the "COAR" section), which you were going to rework. We also need to insert an explanatory section in the supplemental portion to describe the intent and purpose of the "COAR". The relevant pages are 6 and 12-13. Could you take a crack at this? Also, it's occurred to me that we should check with our desk officer at OMB just to make sure we don't need their sign-off before we issue the final regs. Some types of regs need to be vetted by OMB for their budgetary impact. I don't think ours fall into that category but we should check anyway. Do you want to call Kim Newman and ask her, since you've been dealing with her? Please let me know what you find out.
