**Subject:** Investigations Database

1) I just went in Issue #8 and created a new Notes form. When I first clicked on Notes the Notes screen appeared and the Issue field was already filled in with #8 (which is great and the way I want it.) I made my entry and saved it. When I saved it the #8 disappeared from the top of the screen. I then re-opened the same Notes screen but the #8 was still missing. I would like to keep it. Also, at the view screen, there is no date assigned to this entry. I am planning to use the date to keep the various multiple phone call reports and notes reports separate for easy reference. Are you planning to conduct a training session tomorrow afternoon? If so, count me in.
