**Subject:** Where in the world  
david suggested that I make the witw database save the entries into a file for your review. We should discuss Next Friday if you have time, If you do can you add it to your calendar for the afternoon (15mins or so)I think this might address your computer helpdesk question but I did not want to respond on that system.At night when I come in it seems only a few people leave a note that they have left, Is it used in the day time? and it anyone need more training.thanks
