**Subject:** Possible work for summer interns

If you think the following would be appropriate tasks for any of the interns I will present this more formally in an email to Jeremy, cc'd to you and Laura. Part of my look into New Orleans records (as well as Dallas/Fort Worth) records will involve looking at private employments and schools. (If you look in the Gum Shoe you will find that Issues 15, 16, 17, & 18 revolve around these searches for records.) The more reading I do of released government reports (mostly Secret Service and FBI) the more I realize a lot of this ground has been covered in some detail during the WC and HSCA days, as well as during the assassination investigation itself in 1963. I want to find what those entities didn't, but I don't want to look for records which are part of FBI or SS files or which are already at the Archives. Query: Would it be realistic and possible for the interns to conduct searches (on our database, or in open WC and HSCA files) of what has already been produced from those sources and what hasn't been? Let me know what you think. thanks!!
