Subject: I added the Green Consent Agenda form.
I think I have good working models for what we need to do and I bet that by Tuesday we can have something to show to other people.I used the notice blank as a model for the consent agenda, take a look. it needs some formating and more info. What info do we need to give the board for a green item?The RIF itself and the postponement detail are now in good shape the buttons are in place.All of the RIF buttons should now work, try them out It will set the ownership of the document to the correct person.See you on Monday
