Subject: Public Contacts database in Lotus Notes
I have several lists of names (and hope to soon have addresses and telephone numbers to go with them) that need to be typed into the Public Contacts database. This is the kind of project you might want to keep on your desk and work at a little each day whenever you have a few moments.I'll stop by later with the folder of names. If you are not sure about working in the database I'll show you, or Chet can give you more sophisticated training.
