Subject: Database system changes and known bugs

The email portion of the supervisor button is not working at this time, the status is changing but no email messages are going to the supervisor. I hope to have this working by Tuesday morning. In the meantime please just Tell Mary that you have sent her some documents for review. I know its hard to remember that verbal communication stuff but try. Other changes noted below: CIA Team in your review process for 1a and 1b documents you need to enter the correct code and only the correct code for the items in the document. Do not enter both a 1a and a 1b for the same item unless it really is one. If you are as confused about this as me talk with Mary. Other changes below: Changed Postponement code to a Radio Button from a Checkbox. (this will allow for only one entry) Added a 2&4 code to the postponement code. Added a ZSupervisor view for Team leaders to view just the documents they are checking. One other note the FBI team will begin using the database this week so good luck and lets hope it does not meltdown under the pressure.
