Subject: Sensitive Cover Sheets

Body: At the meeting last week with Jeremy, Tracy and me you said that if documents that are National Security Classified are taken out of the scif a classification cover sheet needs to be clipped onto the document. In the R&A meeting Phil asked the question in reference to documents in the scif that are only considered Sensitive (Privacy Issues and that sort of thing). Do we want to create an internal cover sheet for these items or do we only use cover sheets for documents that are classified Confidential, Secret, and Top Secret?
