Subject: Opened document
I entered the basic review which you needed for the one released document from Monday which we have on the data base. Checking the information, I noticed that one of the views is misleading. The view which we get when we click on the document number- the view that lists postponements, vanilla codes, recommendations, etc.- lists the "R" (for routing sheet) page after page two, whereas the routing sheet appears in the document and was entered before page one.
