Subject: Gum Shoe - fax template
From time to time I send faxes to FINCEN requesting them to provide us with certain investigative services. I have to use a form they designed. Up to this point in time I've been typing the information on the hard copy form, but that is rapidly getting out of hand due to the volume of requests. Can you take their form and create a similar template in Gum Shoe, in existing and yet to be opened issues, in order for me to type in the computer what I need. That will give us the record in the computer to satisfy the statute (up to this time I've been saving the faxes in the file to satisfy the statute) and will make a more efficient system for me to send them requests. Let me know what you think. Thanks!!
