Subject: Internet Memo
Currently have two internet options:Option 1: Use WorldCom. Cost: \$220-300 per month depending on use (could be as low as \$100 per month).Benefits, no addition equipment needed other than a modem. Gives full email to all staff. Allows us to have DMARWELL@ARRB.GOV addressing.Some limited web page at additional cost is also possible. (could be expensive and they are still working on it)Option 2: Use local internet provider.Cost \$100 per month.Hardware \$900Software \$1,100Benefits: Allows full web accessDownside: Everyone would need a second Email system for the internet. The Notes gateway is too expensive.Option 3: Keep looking for government source for access.Benefits: Low cost but we will still need to pay to hook up.Same problems as option 2:I think we should go with WorldCom if it gets to high we can lower the costs by access them via the internet with option#2.
