Subject: Public Contacts database
Please add this in the comments section for Dr. John K. Lattimer (Ramsey Clark Panel): "Dr. Lattimer wrote to Representative Stokes on August 1, 1978 (RIF 1801007510122) concerning additional medical/scientific evidence he developed concerning the 'one bullet theory.' On page 2 of the letter Lattimer wrote: '6) We also have materials indicating that the Oswald who lived-in, and later visited in Fort Worth, prior to his leaving for Japan and later Russia, was the same Oswald who returned from Russia later. 7) We also own a large proportion of Oswald's letters written to his mother and brother, Robert, from Russia.' When Dr. Lattimer is contacted concerning any Clark Panel records he may have he should also be asked to donate the above mentioned items, or copies of the items, to the JFJ Collection,"
