Subject: NSA
An informant who did not want its name attached to this information advised me today that it has a friend who is a vendor with NSA. While transacting business with NSA, an NSA employee told this vendor that the ARRB had not asked for the following assassination records, and that if the ARRB did not ask for them, NSA would not produce them, although the agency does have the records. According to the un-named NSA employee/source, the ARRB should ask for records of intercepted conversations between the Cuban community in the United States and the United States government, between the Cuban government and the Cuban community in the United States, and between various Cuban communities in the United States, all for the time period early summer 1963 to early winter 1964.
