Subject: Original LHO records in FBI files
David wants me to locate and obtain for the Collection as many of LHO's original school and employment records as possible. Joe did a lot of searching in the HSCA records at Archives II for me and found that everything there, most of which came from the WC, is a photocopy. I've read FBI and some SS reports that mention agents going to employers and schools for these records, and in some cases agreeing to return the original records after the Bureau was finished with them.query - what do FBI files show about the status of records returned to the originators, are there receipts for the same, are there any originals still in FBI custody that you are aware of, or are there investigative inserts (mini reports) that record the return of the records to the originators.
