Dennis - thanks for your response about Tracy's possible availability. In the event Tracy is available either late this week or next, or will not be here! (I'll be out of the office from 11:30 am Thursday through the close of business this week and next.) May I leave this message with both of you, to give to Tracy, in the event she can help. Thank you. We are trying to identify and obtain copies of all medical/scientific journal articles that Dr. John Nichols has published SINCE 1/1/79 and any papers he may have presented to professional groups since the same date that deal with JFK's assassination and Dr. Nichols' research and experiments concerning ballistics and the assassination. For most of the 1970's, and possibly past that time, and possibly currently, Dr. Nichols was a Professor of Pathology at the University of Kansas Medical Center in Kansas City, Kansas. I am especially interested in a paper he may have presented to the February 1979 Annual Meeting of the American Society of Forensic Sciences in Atlanta, Georgia. The abstract of the paper was captioned (this may not be it's final title, I don't know) PRESIDENT KENNEDY'S HEAD WOUND .The abstract of the paper, which I have a copy of, was co-written by Floyd Foltz, PhD., Department of Anatomy, University of Kansas Medical Center. Thank you both for helping me out with this.
