Subject: Continuously Ringing Phone in the SCIF
This is me... I think it is Wolf Communications calling our server. I hope Doug has not had them arrested. Until we get the new phone line I need to have this line active for the server connection. Can we just unplug the FAX and STU until it is needed? To: ALLcc: From: Douglas Horne/ARRB Date: 09/01/95 05:00:22 PM Subject: Continuously Ringing Phone in the SCIFAs many of you are aware, the secure phone instrument in the SCIF began ringing every 2 or 3 minutes (sometimes more often) at 7:30 A.M. Thursday morning, and continued all day Thursday and all morning Friday. Each time the line was picked up there was silence at the other end (except for two occasions, when Phil got a FAX blast). Thinking it must be a re-dial problem or some computer switch problem, I called the operator today, who referred me to repair, who referred me to the "annoying calls" section. Their number is: (202) 508-7435/38, and spoke to a Ms. Ali. She commenced a trace, and by day's end had determined that the calls were coming from a long-distance source. All I asked for was for them to determine whether this was some kind of re-dial or computer glitch, and try to bring a halt to it; or, alternatively, if some citizen was doing this, to please tell us who it was, or how to contact that person. Ms. Ali said that she should have an answer to the mystery soon, as soon as she hears back from the long-distance company that she contacted and requested assistance of. I'll relay more later when this is all figured out and ceases.
