Subject: FBI Database problem

It looks like the only documents that do not have subject fields are from disks 10270-10271, I will get those disks from the SCIF in the morning and take a look. The Data comes to us in two seperate databases on each disk and we then combine them. One of the databases is just used for the subject field. It could be those disks have some problem with that data. Phil if you could browse the FBI database and see if it fits into this theory. If you see any other large gaps please let me know. If it is limited to these few disks I should be able to get it fixed by Monday. I will need to reimport the FBI database but I can do the smaller Not open database first.
