Subject: FBI Database

Body: To: David Marwell/ARRBcc: Phil Golrick/ARRB From: Chet Rhodes/ARRB Date: 09/22/95 07:11:50 PMSubject: FBI DatabaseThe problem in the FBI database is larger than I thought at first glance. So here is what I would like to do to get us back on track.1. Can kevin talk with the FBI to see if any updates have been made.2. Can he also ask for replacement disks for the 4-5 disks that were bad over the last 2 imports. I can tell him where they are in my office.3. Proceed with the below.I have found over 30 disks worth of subject information that did not make it in the last move of the database. So, I would like to just start over and reimport the disks again.Phil, can you free up one person from the team to help plug disks in over the course of one day?Once the disks are put on the system, I will then proceed to restore the database again.I will be able to come in late on Tues and Weds to start the process with a final date of next Monday to have everything back to normal.I still have not been able to understand how this happened. The one strange pattern that emerges is most of the disks that have missing subject files end in the number 1.Phil, if you could page me Monday and let me know whom I should work with on the project. My own choice would be anyone but Kevin, I worry that we have asked him to do a lot of this kind of work and we should spread the grunt work around.Thanks
