Subject: Steve Tilley -- Double RIFs
I spoke with Steve and he is, like you, concerned. He promised to look into it and report back to us, re: scope of problem and amelioration thereof. Off the top of his head, Steve thought Kris/Matt's explanation might be correct: the fact that the same agency file numbers appeared on both versions of the RIFs supports this theory, he thought. The "Date of Last Review" field corresponds to date of data entry; the fact that these dates differ on two of the three RIFs (though all the document-descriptive data is identical) also support Kris/Matt's double-RIF theory. I will keep you posted.
