Subject:	All names database
Body:	I have tried to get a header at the top of each column with no success. Is this something either of you knows is possible and we just have to figure out how to do it, or you are not sure it can be done? I ask because I have completed inputting the data Jeremy gave me and if the database is complete (design-wise) it should be put on the database of databases so Jeremy and Doug can access it. Please keep me updated and thank you for all your help in this endeavor.
