**Subject:** Questions about Review Track data entry for HSCA privacy releases

**Body:** I presume that the 196 HSCA privacy records processed by the Board today will have to be entered on the Review Track database after the fact. Bob has been good enough to teach me how to do this, but he suggests I consult you on the following question: under the heading "Total Number of Releases" do I list the number of actual documents in any given payroll file (remember, there's only one RIF per file), or some other number? I presume I list each Social Security Number separately under "Total Number of Postponements"; that is, if a given person's SS # is listed 3 times in his/her payroll file, I would indicate 3 postponements? Please advise or, if I should be asking this question of someone else, indicate who. Thanks.
