Author: Cory F. Case/Light Industries @ Light Industries @ WorldComComposed: 10/23 04:50 PMSubject: Notes SlownessCategory: Notes ClientI have a client who just started purchasing CompUSA Pentiums. For whatever reason, they're experiencing extreme slowness when they use these machines to access Notes. The authentication process takes a very long time to complete, and Notes gives the appearance of refreshing views, (taking a long time to display the view, etc.), when they open any database.I asked, and he says that other Networked apps launch & load in a timely manner. Seems very strange that it would just be Notes that's having trouble.Anyone have any ideas, or similar experiences?ThanksAuthor: Alisa Stein/RIA @ RIA @ WorldComComposed: 10/24 03:00 PMReply to : How are they getting to the Server?Are they using TCPIP or SPX or..... The card and interface may not be setup 100%, which may look fine in other programs, but slows down Notes. Alisa Stein-RIAAuthor: Lee Barnett/ZH/GR/UBS @ UBS @ WorldComComposed: 10/24 01:26 AMReply to : Is the chip speed in BIOS set to high or automatic?I saw a marked improvement with my P60 when I changed the (AMI) BIOS setting to high for the CPU.Author: Cory F. Case/Light Industries @ Light Industries @ WorldComComposed: 10/25 09:04 PMReply to : *Thanks, I'll have them check it out.Author: Cory F. Case/Light Industries @ Light Industries @ WorldComComposed: 10/25 09:02 PMReply to : I think they're running SPX.But I agree with the theory on NIC setup. Thanks.
