Subject:	Review Track

I am expressing the "wish list" of David and others who use the Review Track (including myself). I have placed them in order of priority. If this list is not in the correct order David, please correct me. The following is requested very politely:1. Adjust the Unassign Documents from a Meeting macro to wipe out the Board decision "bubble".2. A button that reads "See me later" (or something along that line) for when the Board does anything other than accept the staff recommendation. This is so that in the Board meeting all I have to do is either select "Running Man" when the Board accepts the staff recommendation or the new "See me later" button. This is requested because there is not enough time in the meeting to play with all the helpful bells and whistles you have created.3. A few new views are requested - view "By Meeting with Documents" broken down by agency and by document color. 4. We would like "Running Man" to be able to run through more than one document without having to activate him after each document. Is this possible?5. A way to print just the Green Consent Agenda for each agency, similar to the way you can select the documents for the Yellow and Red.6. For any given document we would like to be able to identify the following in the Review Track: the date a Request for Evidence Form was printed, the date sent, which agency it was sent to, and when the evidence is due. I know we already have views for some of these. I wrote it all out to show a complete overview of the Request for Evidence Form.Okay, do you think that's enough to keep you busy? Thanks for all your help. You are the amazing computer dude.If you have any questions about what I mean,

Body:	please let me know.Thanks again.
