Subject: David Mantik

Body: Dr. Mantik just returned my call--he has agreed to send us: (a) all of his work in detail: lecture notes, lecture data slides, etc. and I believe a portion of an unpublished manuscript; and (b) a summary of his findings as they stand now, more easily readable for the non-medically trained lay person...he feels his findings regarding interpretation of the X-Rays and their authenticity is now in a "mature" form, and that his data is relatively robust, having been repeated now a number of times, and cross-checked with numerous control experiments.Regarding other writings he would recommend, they are things we already have...namely, the Joseph Riley material, and the Randy Robertson material. The Randy Robertson testimony and article is in the Conyers subcommittee report (white booklet), and Joe Riley's material is in two documents: your Third Decade article, and a follow-on abstract from 1994 ASK in Dallas (which I think I already gave you). END
