**Subject:** Abbreviations update  
Could you put into the Acronyms/Abbreviations research aid the major crypts that have now been declassified? If you can do it by Monday mid-afternoon, I would appreciate it. Please include ODENVY, ODURGE, ODACID, ODOATH, etc. as well as the operational crypts from the major surveillance in Mexico City. Make sure they have been declassified. Ask other CIA people for suggestions. The document is at r:\aids\id-R&A. Noelle can help you get the document if there are any questions. Let me know when you have completed it. Thanks.
