Subject: Cuba research database (?)

As Kevin, Manuel and I begin work on our Cuba research, we have realized that it would be helpful to have a listing of each exile group and various information about them. I am compiling that list currently. Upon completeing this research, I would like to enter them in standard format and have them available to each of us on computer. I am submitting a sample entry with this message... would it be possible, or efficient, to create a database of the headings, so that rather than rewrite everything with each entry, I could just fill in the fields? If this is not a practical use of Chet's time (creating a database for only three peoples' research), then I will be glad to create the guide myself. Just wanted to check. Thanks.
SAMPLEGroup : JURE (Junta Revolucionaria Cubana)Formed : July 23, 1962 (press conference)Leader(s) : Manolo RayOthers Associated : none US Govt Connection (Y/N) : Y: CIA. Aid withdrawn late 1963 due to Ray's unreliability.Disbanded : August 1968Other information : Very hostile towards Artimĩ½ and CIA. Tried to reclaim "unifying" role once held by CRC. Sylvia Odio was associated with JURE and claims that those who brought Oswald to her home were JURE-associated Cubans.This is the type of thing I would like to create. Can it be done so that the fields in bold are permanent and I merely have to enter information? I would also want to create a similar base for individuals not necessarily associated with a particular group.
