Because there were so many payroll records and because all the postponements were Social Security numbers, individual postponement forms for each SSN were not done. This poses a problem at the Final Determination Form stage because the form as set up requires information regarding individual postponements, their page number within the document, etc. Chet is intending to do a HSCA-payroll specific program so that all 178 can be kicked out at once where the field won't require a specific postponement; All the postponements in this document represent Social Security numbers.PS - It would be very helpful to have closure on this today whileBody:Chet is here to make whatever changes are decided upon.Thanks in advance. recstat:recstat:N DeliveryReport:B ReturnReceipt:B Categories:	NR_key_name: SendTo: CopyTo:	2979D39972E2A3B28525628B0077A979 CN=Chet Rhodes/O=ARRB @ ARRB
