Subject: Final Determination Forms (FDFs) for 11/14 meeting
I've put "my" FDFs in your box. These represent 35 HSCA records. Thirty-two of these records are payroll certification forms containing, in most cases, 100 or more SSN redactions. For these, I've given you the FDFs but not copies of the actual payroll records. There are three additional HSCA records in "my" batch: two regarding the David Ferrie case and one involving some medical history of a guy who called into an HSCA staffer. In these latter three instances (all opened in full), I have attached the actual record to the FDF for you. The other 30-or-so HSCA records processed by the Board at the 11/4 meeting were Phil/Joan documents. You'll have to see them about those.
