**Subject:** Consent release database.  
Chet just introduced me to the consent release database. Entering the current release from CIA should not be a problem, but I have a question. What do we do with the information that has been entered on the Review Track database by the analysts? We need to remove it from Review Track to make it clear that the document does not need to be addressed by the Board. But what do we do with it? Are we required to save the staff recommendations for the record even though CIA has unilaterally released the documents? Or should we delete it? If it must be saved should we cut and paste that information into the Consent Release database, or is there a more appropriate place for it?Thanks for your help.
