**Subject:** HSCA Skull model  
Working in consultation with Dennis, I spoke with Kris Wilhelm earlier today, who agreed to talk to Diane Dimkoff about it and get back to me. Kris called back a few minutes ago. Diane wants to check with their preservation people to make certain there isn't some additional packaging/protection required for transport purposes. They assume this will take 24 hours and so they suggest that Matt and Kris walk it up to our offices on Friday morning. In my experience, their offering to walk it up is their polite way of saying they don't trust me not to drop it. Moreover, NARA will provide us with white gloves which must be used by anyone handling the skull. Lastly, NARA is assuming (and I did not disabuse them) that the skull will be kept in our SCIF at all times.
