Subject: Review track: consent releases; release dates; evidence date view.

When you finally get a breather, please offer some suggestions as to how to copy the review data into the consent release database. Also, as was discussed at the last review track training session, you were going to try to make the date of release, instead of just the number of years, appear on the determination summary forms. If that could happen before the next Board meeting, it would be great. Finally, in the Evidence Date view of the Archive database, the document numbers are not arranged in numerical order. If you can make that happen, your status as computer god will be confirmed. Thanks for your help.
