Subject:	Printing Macro
Body:	I have created (at Phil's request) a great new macro under the printing macro area in Review Track. The macro is called Refresh and Print board review forms.To use it.Select the documents you with to print BRF for.you need to first choose the red, run this macro and then select any yellow documents.Run the macro.It will take a long time to refresh the documents but this will make sure they are current.After a long period of time (more than an hour if printing > 60 documents) the print box will appear.Select the correct form with form override and it will then print them.Thanks Phil for the idea.If you have any questions please see Val or Chet.
