Subject: Aguilar Phone call
Dr. Aguilar called me again (second time today) and I took the call. It seems Kathy Cunningham relayed to him that we had "concerns" about Dr. Livingston based on my conversation with her last November. He seemed to think that the veracity of Dr. Livingston is a major issue around here. Dr. Aguilar told me that he has met and spoken to Livingston and thinks he is credible. I explained to Aguilar that I had no independent knowledge of Livingston's background or credibility and that I am not currently working on anything having to do with him (I did not mention the Humes deposition or McNamara phone call). I politely suggested that if he wanted to talk more about this he should speak with you. He said he would discuss it with you next time you have a conversation.
