Subject: Notation Voting
I needed to move a few docs into the voting machines to do some testing so take a look and do any cleanup you need to get started.You can delete things in the machines and then just reassign them in the RT to a new or same box to get them to mail out again.I set up all the macros for the three types of voting Accept, Discuss, Non-Vote.Go ahead and assign all the documents to boxes. That should move the docs over to the Voting Machines. Then in each voting machine Use the macros or go into each document to make the votes.As we talked only the 6 documents that we are considering sending out for the next FRN should be Non-Voted in Henry's voting machine.You might want to assign documents to David, Bob, Kevin and Val and have them Vote inside the RIFs as a test of that part of the system. The macros should work just like the buttons inside each RIF.Good luck and see you on Thursday Also once again thanks for staying late Tonight I think It will put us on track in this project.
