**Subject:** Confusion at NARA II over FBI Doc from Nov. meeting  
Came by to see you but, not finding you, I thought I'd get this down before I lost my notes from my conversation with Steve Tilley. Steve started with me because he says I delivered this batch of documents to him, signed the receipt, etc., when November's documents were taken out to him in January. According to his list, Steve says he should have FBI record 124-10087-10334 in this batch of documents, but this document is not among those delivered to him in January. Similarly, he does have in this batch FBI record 124-10027-10011, but says this record is not cited in his list as one that should have been in the batch. Is his list wrong, or is his document pile wrong? Or is there some other, altogether mysterious, explanation.
